

Caterease Virtual Training Room

The Caterease Virtual Training experience is just like being there! Using a simple state-of-the-art browser app, you can attend selected regional training classes remotely, while still interacting with other students and instructors as if you were right there in the room! Raise your hand, ask and answer questions and even share your screen with the instructor – all from the comfort of your own desk.

What You Need:

Caterease Training Program

You will not be using your own Caterease program during class. We will send you login credentials for a training program so you can follow along with class lessons and exercises.

Meeting Software

There is a small plug-in for internet browsers that is compatible with most PC's and Macs. You will receive a link prior to the class.

Web Cam

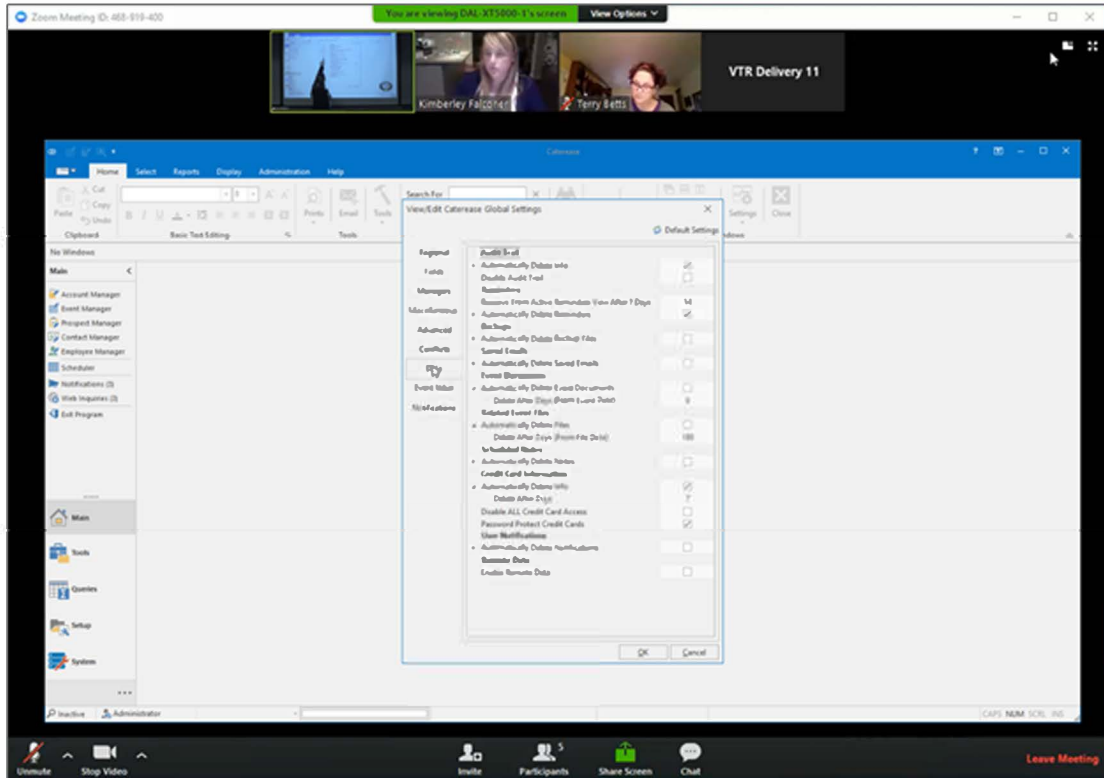

It's important for the instructor to be able to see and interact with you during class, so you will need to have a web camera.

Two Monitors

You will need one monitor to view the class, instructor and instructor's Caterease program – and a second monitor to use the training program for class exercises.

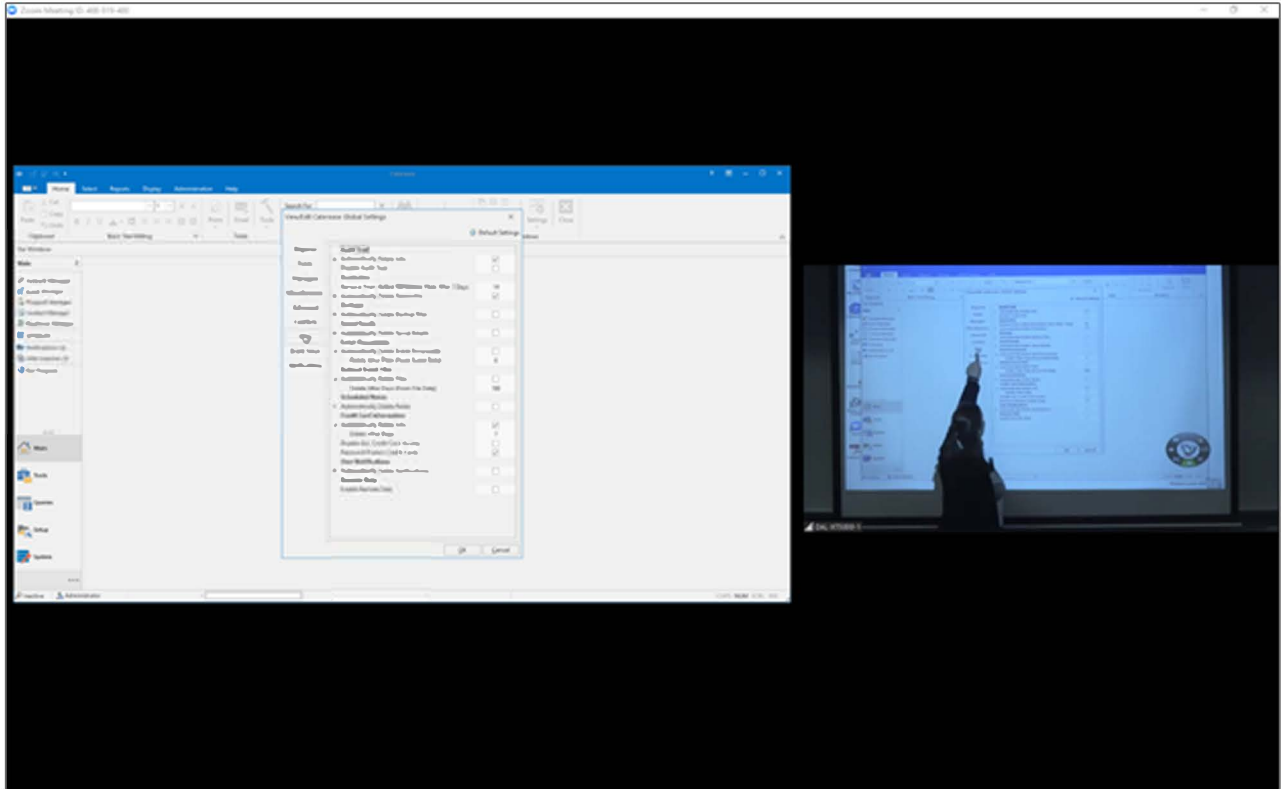

How It Works

Easily log into the Virtual Training Room using the link you are provided, and you will instantly be “present” in the classroom. Choose from a variety of optional views, including:

Software - Focused View

This puts the focus on the instructor’s Caterease program, with each VTR student and the instructor visible in a gallery across the top of the screen. This is a great way to always clearly see the specific area of the program the instructor is sharing with the class.

Side-By-Side View

This shows the instructor's Caterease program on one side of your screen, and the classroom and instructor on the other side. This provides a great opportunity to see the instructor's program and also the instructor as he or she points to different areas of the screen.

Instructor's Perspective

Using the CaterEase Virtual Training Room, instructors are able to see, hear and interact with you just as if you were actually sitting in the class. Multiple large-screen monitors show all VTR students as they listen and learn, and allow instructors and fellow students to collaborate with you easily in real time.

The Virtual Training Room is an excellent way to get comprehensive, hands-on training without the time and expense of travel. Check out this brief introductory video to learn more:
