

Configuring the iPhone for CaterEase Connect

This document will assist you in configuring your Apple iPhone for use with CaterEase Connect. Access to CaterEase Connect via mobile devices is provided as a no-charge option and is **NOT** covered under the standard CaterEase connect Service Level Agreement.

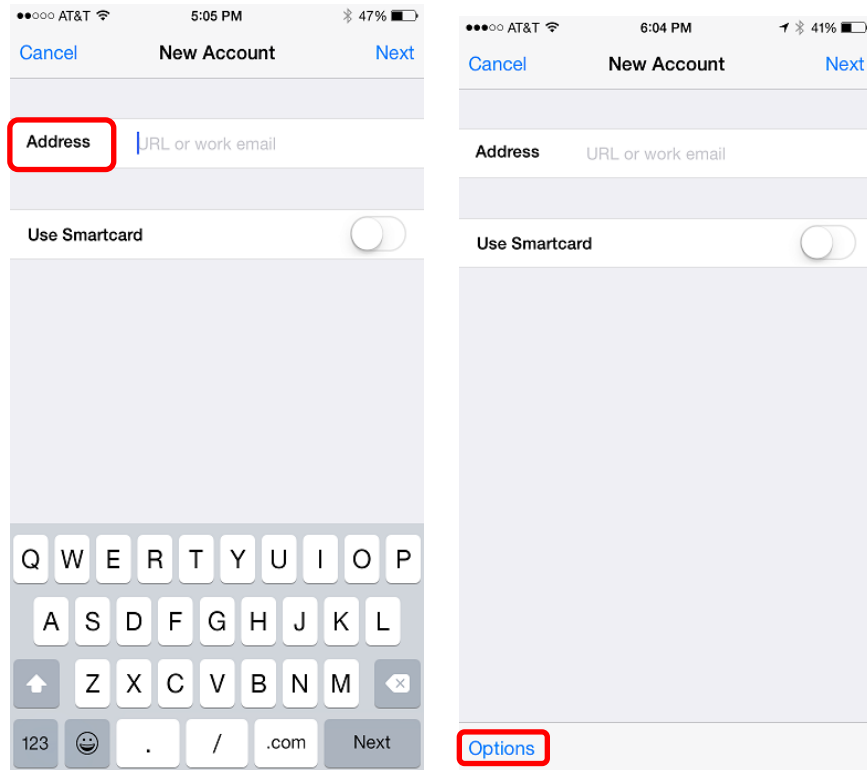

- 1) Install the 'Citrix Receiver' app from the App Store then click 'Open'.

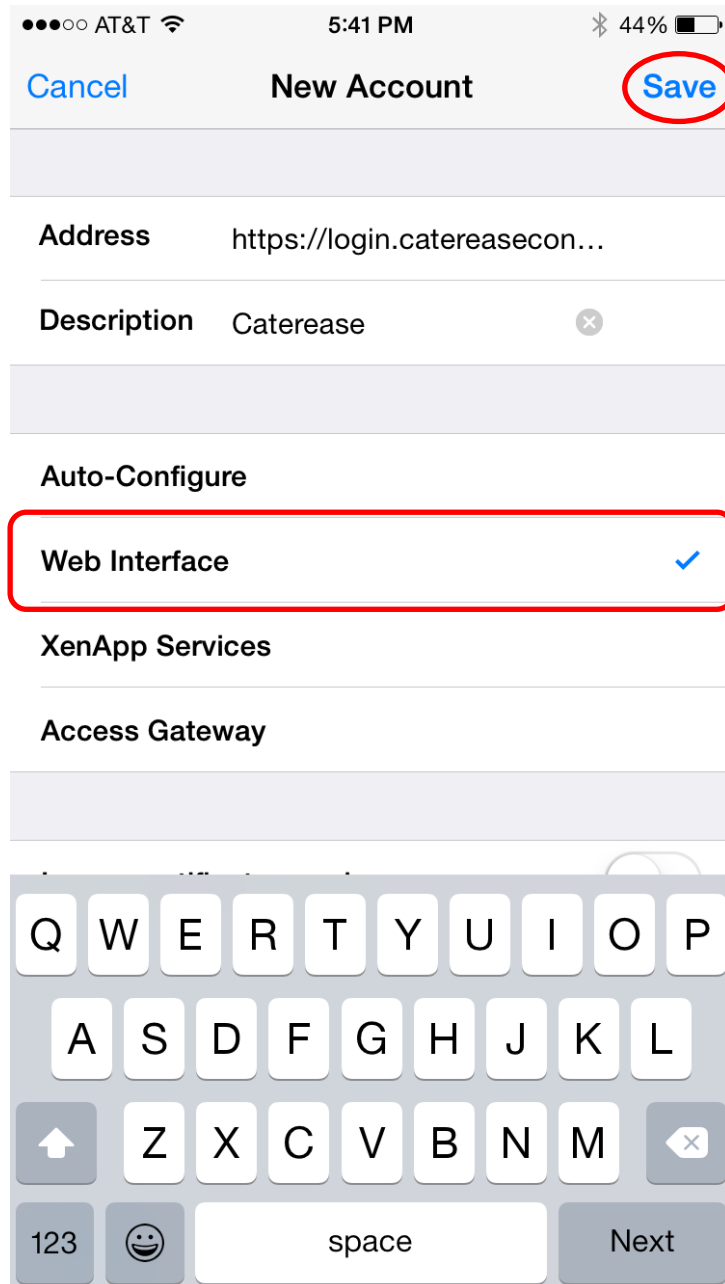

2) Select 'Add Account'.

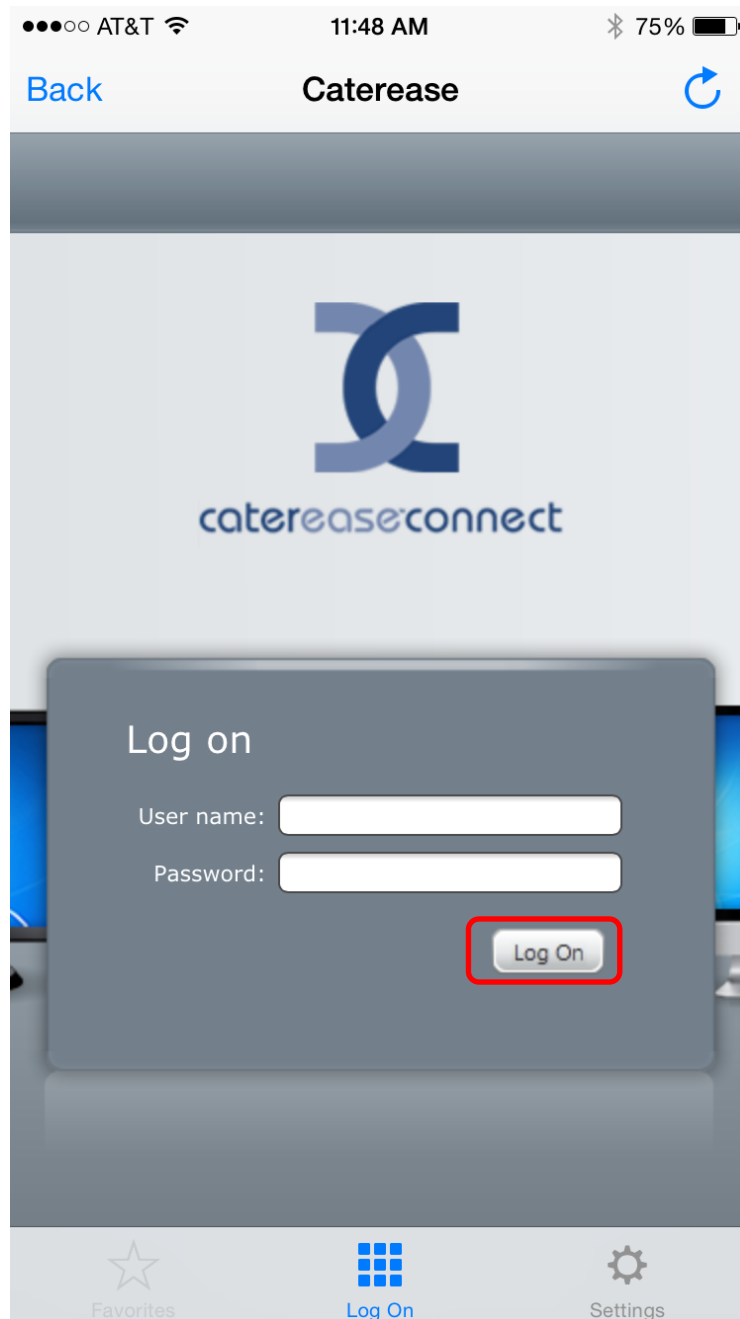

- 3) Tap the **'Options'** button in the bottom left corner. (You may have to tap the word **'Address'** to close the keyboard.) Tap the **'Manual Setup'** button.

- 4) For the Address enter: <https://login.catereaseconnect.com>
- 5) In the 'Description' field you can type anything but 'Caterease' is a suggestion.
- 6) * Make sure the box for 'Web Interface' is *checked*.
- 7) **Ignore certificate warnings** can remain off.
- 8) Click "Save" in the right corner.

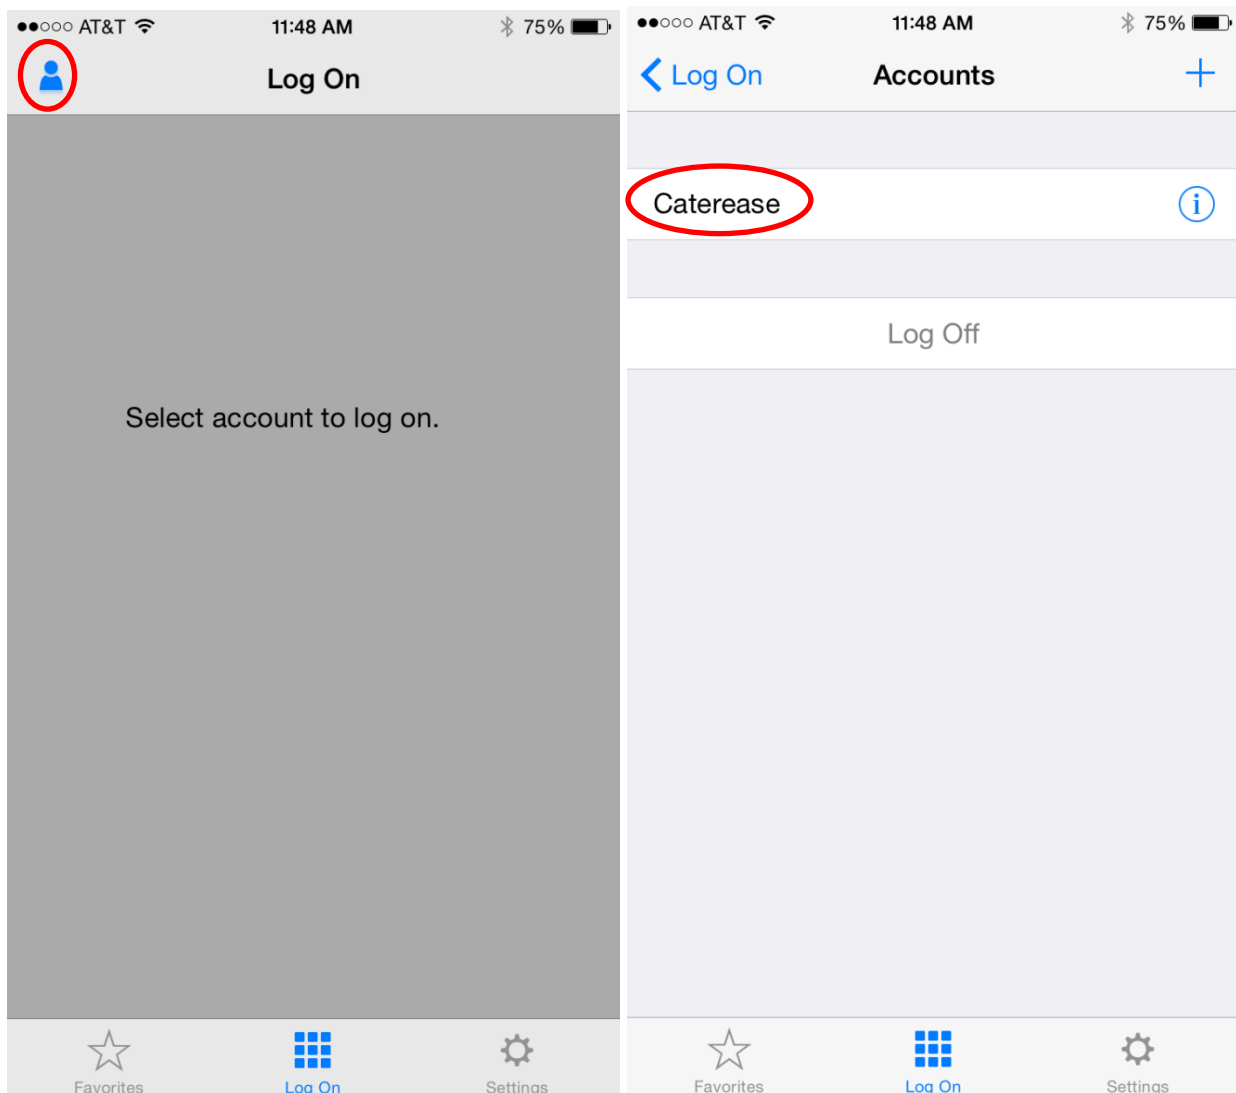

At this point the Citrix Receiver App should now be installed and configured for use on your iPhone. You will now be automatically sent to the Caterease Connect login screen.

1. Enter your Caterease Connect username and password then tap the **'Log On'** button.
2. After log on, tap the Caterease icon to start Caterease Connect.

To login again later after closing the App:

1. Open the Citrix Receiver App and tap the blue avatar in the upper left hand corner of the **Log On** screen.
2. In the **Accounts** screen, Tap on '**CaterEase**' (or whatever you called the connection in step #5 above).

* Encountering Errors

If for any reason you encounter an error, please retrace your steps and make sure that you have entered all settings exactly as they appear above – especially checking '**Web Interface**' (Step #6 above).
